

CLEVELAND PREPARATORY ACADEMY

July 31, 2019

Dear Cleveland Preparatory Academy Families,

Cleveland Preparatory Academy School will be conducting Special Needs Screening (hearing, vision, speech/communications, health/medical problems, and any developmental disorders) during the months of September and October to all Kindergarten and 1st Grade students.

Why is it Important to have your child screened?

To identify if your child has any problems with speech/communications, health/medical problems, and any developmental disorders and for the school to help provide support in any areas that are identified. If your child fails any portions of the screening, you will be informed of test results and necessary follow-up such as further assessment will occur.

All screening tests will be proctored by Total Education Solutions. Total Education Solutions has been committed to meeting the health & educational needs of children in our school for over two years. Total Education Solutions' psychological, health, speech and educational services now serve tens of thousands of children each year.

We look forward to working with you and your scholar and promoting a healthy and successful learning environment for all scholars at Cleveland Preparatory Academy!

Yours in Education,

Robert Williams

Principal
